What is Forex?

Forex, also known as foreign exchange, FX or currency trading, is a decentralized global market where all the world's currencies trade. The forex market is the largest, most liquid market in the world with an average daily trading volume exceeding \$5 trillion. All the world's combined stock markets don't even come close to this. But what does that mean to you? Take a closer look at forex trading and you may find some exciting trading opportunities unavailable with other investments.

Spot Forex Market:

The physical exchange of a currency pair, which takes place at the exact point the trade is settled – ie 'on the spot' – or within a short period of time.

Forward Forex Market:

A contract is agreed to buy or sell a set amount of a currency at a specified price, to be settled at a set date in the future or within a range of future dates.

Future Forex Market:

A contract is agreed to buy or sell a set amount of a given currency at a set price and date in the future. Unlike forwards, a futures contract is legally binding.

Office Address:

USA: 1188 Willis Ave Suite#801 Albertson, NY 11507

BAN: 7/2 Larmini Street, Wari, Dhaka, dhaka -1203 – Bangladesh

Canada: 474 40th Street , Calgary , Alberta, T2E 7T6, Canada

Electronic Trading Platform

Unlike shares or commodities, forex trading does not take place on exchanges but directly between two parties, in an over-the-counter (OTC) market. The forex market is run by a global network of banks, spread across four major forex trading centres in different time zones: London, New York, Sydney and Tokyo. Because there is no central location, you can trade forex 24 hours a day.

How Do Currency Market Work?

Most traders speculating on forex prices will not plan to take delivery of the currency itself; instead they make exchange rate predictions to take advantage of price movements in the market. Forex, or foreign exchange, can be explained as a network of buyers and sellers, who transfer currency between each other at an agreed price.

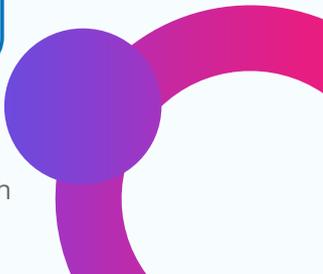

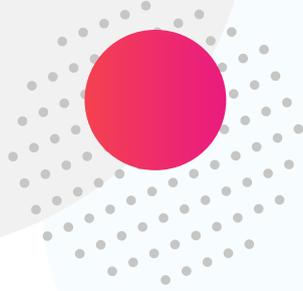

It is the means by which individuals, companies and central banks convert one currency into another – if you have ever travelled abroad, then it is likely you have made a forex transaction. While a lot of foreign exchange is done for practical purposes, the vast majority of currency conversion is undertaken with the aim of earning a profit. The amount of currency converted every day can make price movements of some currencies extremely volatile. It is this volatility that can make forex so attractive to traders: bringing about a greater chance of high profits, while also increasing the risk.

Stock Trading with EFM

Trading stocks allows investors to trade the stock market with EFM right by their side. Stock traders hope to profit from the increases in a company's value over time, which in turn raises the value of company stocks. Investors may hold stocks for long periods of time in order to maximise on the long-term movements of an equity and the stock market. EFM has access to direct liquidity pricing, with real-time data straight from the three largest stock exchanges in the world, NYSE, NASDAQ, Tokeyo and London stock exchange

Globally Regulated & Licensed:

The EFM brand is regulated and licensed under the FSC (Mauritius), UK's FCA, USA, Bangladesh, CySEC and South Africa's FSCA, among others.

Secure & Safe:

Your funds are kept safe in segregated accounts, and your trades are protected by negative balance.

Transparent:

Performance statistics, including Requote, Slippage and Order Execution, are checked by PWC.

Exceptional Trading Conditions:

Industry standard trading conditions for every type of trader.

Committed to Education:

We offer regular seminars, workshops and webinars in multiple languages, regular Contests & Promotions.

Office Address:

USA: 1188 Willis Ave Suite#801 Albertson, NY 11507

BAN: 7/2 Larmini Street, Wari, Dhaka, dhaka -1203 – Bangladesh

Canada: 474 40th Street , Calgary , Alberta, T2E 7T6, Canada

Return on Investment (ROI)

A profitability measure that evaluates the performance of a business by dividing net profit by net worth. Return on investment, or ROI, is the most common profitability ratio. There are several ways to determine ROI, but the most frequently used method is to divide net profit by total assets. So if your total assets are 500\$ your ROI would be 2\$ to 3.5\$ daily.

Return on investment isn't necessarily the same as profit. ROI deals with the money you invest in the company and the return you realize on that money based on the net profit of the business. Profit, on the other hand, measures the performance of the business. Don't confuse ROI with the return on the owner's equity. This is an entirely different item as well. Only in sole proprietorships does equity equal the total investment or assets of the business. You can use ROI in several different ways to gauge the profitability of your business. For instance, you can measure the performance of your pricing policies, inventory investment, capital equipment investment, and so forth. ROI ratio is 0.40 to 0.70
